AN ORDINANCE TO ADOPT REGULATIONS AND PROCEDURES FOR BASIC CABLE TV RATE REGULATIONS

THE VILLAGE OF EDMORE ORDAINS:

Section 1. Definitions.

For purposes of this Ordinance, "Act" shall mean the Communications Act of 1934, as amended (and specifically as amended by the Cable Television Consumer Protection and Competition Act of 1992, Pub. L. 102-385), and as may be amended from time to time; "FCC" shall mean the Federal Communications Commission; "FCC Rules" shall mean all rules of the FCC promulgated from time to time pursuant to the Act; "basic cable service" shall mean "basic service" as defined in the FCC Rules, and any other cable television service which is subject to rate regulation by the Village pursuant to the Act and the FCC Rules; "associated equipment" shall mean all equipment and services subject to regulation pursuant to 47 CFR 76.923; and an "increase" in rates shall mean an increase in rates or a decrease in programming or customer services as provided in the FCC Rules. All other words and phrases used in the Ordinance shall have the same meaning as defined in the Act and FCC Rules.

Section 2. Purpose; Interpretation.

The purpose of this Ordinance is to: 1) adopt regulations consistent with the Act and the FCC Rules with respect to basic cable service rate regulation, and 2) prescribe procedures to provide a reasonable opportunity for consideration of the views of interested parties in connection with basic cable service rate regulation by the Village. This Ordinance shall be implemented and interpreted consistent with the Act and FCC Rules.

Section 3. Rate Regulations Promulgated by FCC.

In connection with the regulation of rates for basic cable connection with the regulation of rates for basic cable service and associated equipment, the Village of Edmore shall follow all FCC Rules.

Section 4. Filing; Additional Information; Burden of Proof.

- (a) A cable operator shall submit its schedule of rates for basic service tier and associated equipment or a proposed increase in such rates in accordance with the Act and the FCC Rules. The cable operator shall include as part of its submission such information as is necessary to show that its schedule of rates or its proposed increase in rates complies with the Act and the FCC Rules. The cable operator shall file ten (10) copies of the schedule or proposed increase with the Village Clerk. For purposes of this Ordinance, the filing of the cable operator shall be deemed to have been made when at least ten (10) copies have been received by the Village Clerk. The Village council may, by resolution or otherwise, adopt rules and regulations as allowed by law prescribing the information, data and calculations which must be included as part of the cable operator's filing of the schedule of rates or a proposed increase.

- (b) In addition to information and data required by rules and regulations of the Village pursuant to Section 4(a) above, a cable operator shall provide all information requested by the Village Manager that is related and helpful in connection with the Village's review and regulation of existing rates for the basic service tier and associated equipment or a proposed increase in these rates. The Village Manager may establish reasonable deadlines for submission of the requested information and the cable operator shall comply with such deadlines.
- (c) A cable operator has the burden of proving that its schedule of rates for the basic service tier and associated equipment or a proposed increase in such rates complies with the Act and the FCC Rules including, without limitation, 47 USC 543 and 47 CFR 76.922 and 76.923.

Section 5. Proprietary Information.

- (a) If this Ordinance, any rules or regulations adopted by the Village pursuant to Section 4(a), or any request for information pursuant to Section 4(b) requires the production of proprietary information, the cable operator shall produce the information. However, at the time the allegedly proprietary information is submitted, a cable operator may request that specific, identified portions of its response be treated as confidential and withheld from public disclosure.
The request must state the reason why the information should be treated as proprietary and the facts that support those reasons. The request for confidentiality will be granted if the Village determines that the preponderance of the evidence shows that non-disclosure is consistent with the provisions of the Freedom of Information Act, 5 U.S.C. 552. The Village shall place in a public file for inspection any decision that results in information being withheld. If the cable operator requests confidentiality and the request is denied, (1) where the cable operator is proposing a rate increase, it may withdraw the proposal, in which case the allegedly proprietary information will be returned to it; or (2) the cable operator may seek review within five working days of the denial in any appropriate forum. Release of the information will be stayed pending review.
- (b) Any interested party may file a request to inspect material withheld as proprietary with the Village. The Village shall weigh the policy considerations favoring non-disclosure against the reasons cited for permitting inspection in light of the facts of the particular case. It will then promptly notify the requesting entity and the cable operator that submitted the information as to the disposition of the request. It may grant, deny, or condition a request. The requesting party or the cable operator may seek review of the decision by filing an appeal with any appropriate forum. Disclosure will be stayed pending resolution of any appeal.
- (c) The procedures set forth in this section shall be construed as analogous to and consistent with the rules of the FCC regarding requests for confidentiality including, without limitation, 47 CFR 0.459.

Section 6. Public Notice; Initial Review of Rates.

Upon the filing of ten (10) copies of the schedule of rates or the proposed increase in rates pursuant to Section 4 (a) above, the Village Clerk shall publish a public notice in a newspaper of general circulation in the Village which shall state that: 1) the filing has been received by the Village Clerk and (except those parts which may be withheld as proprietary) is available for public inspection and copying, and 2) interested parties are encouraged to submit written comments on the filing to the Village Clerk not later than seven (7) days after the public notice is published. The Village Clerk shall give notice to the cable operator of the date, time, and place of the meeting at which the Village Council shall first consider the schedule of rates or the proposed increase. This notice shall be mailed by first-class mail at least three (3) days before the meeting. In addition, if a written staff or consultant's report on the schedule or rates or the proposed increase is prepared for consideration of the Village Council, the Village Clerk shall mail a copy of the report by first-class mail to the cable operator at least three (3) days before a meeting at which the Village Council shall first consider the schedule of rates or the proposed increase.

Section 7. Tolling Order.

After a cable operator has filed its existing schedule of rates or a proposed increase in these rates, the existing schedule of rates will remain in effect or the proposed increase in rates will become effective after thirty (30) days from the date of filing under Section 4 (a) above unless the Village Council (or other properly authorized body or official) tolls the thirty (30) day deadline pursuant to 47 CFR 76.933 by issuing a brief written order, by resolution or otherwise, within thirty (30) days of the date of filing. The Village Council may toll the thirty (30) day deadline for an additional 90 days in cases not involving cost-of-service showings and for an additional 150 days in cases involving cost-of-service showings.

Section 8. Public Notice; Hearing on Basic Cable Service Rates Following Tolling of 30-Day Deadline.

If a written order has been issued pursuant to Section 7 and 47 CFR 76.933 to toll the effective date of existing rates for the basic service tier and associated equipment or a proposed increase in these rates, the cable operator shall submit to the Village any additional information required or requested pursuant to Section 4 of this Ordinance. In addition, the Village Council shall hold a public hearing to consider the comments of interested parties within the additional 90 day or 150 day period, as the case may be. The Village Clerk shall publish a Public notice of the public hearing in a newspaper of general circulation within the Village which shall state: 1) the date, time and place at which the hearing shall be held, 2) interested parties may appear in person, by agent, or by letter at such hearing to submit comments on or objections to the existing rates or the proposed increase in rates, and, 3) copies of the schedule of rates or the proposed increase in rates and related information (except those parts which may be withheld as proprietary) are available for inspection or copying from the office of the Clerk. The public notice shall be published not less than fifteen (15) days before the hearing. In addition, the Village Clerk shall mail by first-class mail a copy of the public notice to the cable operator not less that fifteen (15) days before the hearing.

Section 9. Staff or Consultant Report; Written Response.

Following the public hearing, the Village Manager shall cause a report to be prepared for the Village Council which shall (based on the filing of the cable operator, the comments or objections of interested parties, information requested from the cable operator and its response, staff or consultant's review, and other appropriate information) include a recommendation for the decisions of the Village Council pursuant to Section 10. The Village Clerk shall mail a copy of the report to the cable operator by first-class mail not less than twenty (20) days before the Village Council acts under Section 10. The cable operator may file a written response to the report with the Village Clerk. If at least ten (10) copies of the response are filed by the cable operator with the Village Clerk within ten (10) days after the report is mailed to the cable operator, the Village Clerk shall forward it to the Village Council.

Section 10. Rate Decisions and Orders.

The Village Council shall issue a written order, by resolution or otherwise, which in whole or in part, approves the existing rates for basic cable service and associated equipment or a proposed increase in such rates, denies the existing rates or proposed increase, orders a rate reduction, prescribes a reasonable rate, allows the existing rates or proposed increase to become effective subject to refund, or orders other appropriate relief, in accordance with the FCC Rules. If the Village Council issues an order allowing the existing rates or proposed increase to become effective subject to refund, it shall also direct the cable operator to maintain an accounting pursuant to 47 CFR 76.933. The order specified in this Section shall be issued within 90 days of the tolling order under Section 7 in all cases not involving a cost-of-service showing. The order shall be issued within 150 days after the tolling order under Section 7 in all cases involving a cost-of-service showing.

Section 11. Refunds; Notice.

The Village Council may order a refund to subscribers as provided in 47 CFR 76.942. Article 1. General Provisions

1.1 Title

These regulations shall officially be known, cited and referred to as the Wireless Telecommunications Facilities Regulations of the Village of Edmore (hereinafter “these regulations”).

1.2 Purposes

In order to protect the public health, safety and general welfare of the community, while accommodating the communications needs of residents and business, these regulations are necessary in order to:

1. Facilitate the provision of wireless telecommunications services to the residents and business of the village.
2. Minimize adverse visual effects of towers through careful design and siting standards.
3. Avoid potential damage to adjacent properties from tower failure through structural standards and setback requirements.
4. Provide mechanisms for the mitigation of tower proliferation through tower sharing requirements for all new tower applications and those existing towers that are physically capable of sharing.

Article 2. Wireless Communications Facility Application Procedure and Approval Process

2.1 General Procedure

The submission of applications for wireless communications facilities shall follow the same procedure as the Edmore Zoning Ordinance prescribes for all other zoning applications.

2.2 Additional Procedures

1. In addition to the information required elsewhere in the Village of Edmore Zoning Ordinance, Zoning Compliance Permits for wireless communication facilities shall include the following information:

- A. Describes the tower height and design including a cross section and elevation.
- B. Documents height above grade for all potential mounting positions for co-locating antennas and the minimum separation distances between antennas.
- C. Documents the tower’s capacity, including the number and type of antennas that it can accommodate.

D. Documents what steps the applicant will take to avoid interference with established public safety telecommunications.

E. Includes an engineer's stamp and registration number.

F. Includes other information necessary to evaluate the request.

G. A copy of the Federal Aviation Administration's response to the submitted "Notice of Proposed Construction or Alteration" (FAA Form 7460-1).

H. Proof of compliance with applicable Federal Communications Commission regulations.

Article 3. General Approval Standards

Generally, the Village Council shall grant approval of a wireless communication facility if the following conditions are met:

1. The location of the proposed tower is compatible with the Zoning Ordinance.
2. All efforts to locate on an existing tower have been unsuccessful or it is legally or physically impossible to locate an existing tower.
3. The submitted site plan complies with the performance criteria set in these regulations.
4. The proposed facility/tower will not unreasonably interfere with the view from any public park, natural scenic vista, historic building or major view corridor.
5. The lowest six feet of the facility/tower shall be visually screened by trees, large shrubs, solid walls or fences and/or nearby building.
6. The height and mass of the facility/tower does not exceed that which is essential for its intended use and public safety.
7. The owner of the wireless communications facility has agreed to permit other persons/cellular providers to attach cellular antenna or other communications apparatus that do not interfere with the primary purpose of the facility.
8. There exists no other facility/tower that can reasonably serve the needs of the owner of the proposed facility/tower.
9. The proposed facility/tower is not constructed in such a manner as to result in needless height, mass or guy wires.
10. The color of the proposed facility/tower will be of a light tone or color (except where required otherwise by the FAA) so as to minimize the visual impact and that the tower will have a security fence around the tower base or the lot where the tower is located.
11. The facility/tower is in compliance with any other applicable local, state, or federal regulations.

Article 4. General Wireless Communications Facility Performance Standards

4.1 Co-Location Requirements

All commercial wireless telecommunications towers erected, constructed or located within the village shall comply with the following requirements:

1. A proposal for a new commercial telecommunications service tower shall not be approved unless the Village council finds that the telecommunications equipment planned for the proposed tower cannot be accommodated on an existing or approved tower or building within a one miles search radius (one-half mile search radius for towers under 120 feet in height, one quarter mile search radius for towers under 80 feet in height) of the proposed tower due to one or more of the following reasons:
 - A. The planned equipment would exceed the structural capacity of the existing building or approved tower or building, as documented by a qualified and licensed professional engineer, and the existing or approved tower cannot be reinforced, modified or replaced to accommodate planned or equivalent equipment at a reasonable cost.
 - B. The planned equipment would cause interference materially adversely impacting the usability of other existing or planned equipment at the tower or building as documented by a qualified and licensed professional engineer and the interference cannot be prevented at a reasonable cost.
 - C. Existing or approved towers and buildings within the search radius cannot accommodate the planned equipment at a height necessary to function reasonably as documented by a qualified and licensed professional engineer.
 - D. Other unforeseen reasons that make it infeasible to locate the planned telecommunications equipment upon an existing or approved tower or building.

2. Any proposed commercial wireless telecommunications service tower shall be designed, structurally, electronically and in all respects, to accommodate both the applicant's antennas and comparable antennas for at least two additional users if the tower is over 100 feet in height, or for at least two additional users if the tower is over 60 feet in height unless the Village Planner finds that such accommodations are not necessary. Towers must be designed to allow for future rearrangement of antennas on the tower and to accept antennas mounted at varying heights.

4.2 Tower and Antenna Design Requirements

Proposed or modified towers and antennas shall meet the following design requirements:

1. Towers and antennas shall be designed to blend into the surrounding environment through the use of color and camouflaging architectural treatment, except in instances where the color is dictated by federal or state authorities such as the Federal Aviation Administration.

2. Commercial wireless telecommunications service towers shall be of a monopole design unless the Village Planner determines that an alternative design would better blend in to the surrounding environment.

4.3 Tower Height

The maximum tower height permitted in the village is calculated by applying the following:

1. If the tower is designed to accommodate only one service provider, the maximum height shall be 120 feet from pre-construction grade.
2. If the tower is designed to accommodate two service providers, the maximum height shall be 160 feet from grade.
3. If the tower is designed to accommodate more than two service providers, the maximum height shall be 200 feet from grade.

4.4 Accessory Utility Building

All utility buildings and structures accessory to a tower shall be architecturally designed to blend in with the surrounding environment and shall meet the minimum setback requirements of the underlying zoning district. Ground mounted equipment shall be screened from view by suitable vegetation, except where a design on non-vegetative screening better reflects and complements the architectural character of the surrounding neighborhood.

4.5 Tower Lighting

Towers shall not be illuminated by artificial means and shall not display strobe lights unless such lighting is specifically requested by the Federal Aviation Administration or other federal or state authority for a particular tower.

4.6 Antennas Mounted on Structures, Roofs, Walls and Existing Towers

The placement of wireless telecommunications antennas on roofs, walls and existing towers may be approved by the Village Council, providing the antennas meet the requirements of these regulations, after submittal of:

1. A final site and building plan, and;
2. A report prepared by a qualified and licensed professional engineer indicating the existing structure or tower's suitability to accept the antenna and the proposed method of affixing the antenna to the structure. Complete details of all fixtures and couplings, and the precise point of attachment shall be indicated.

4.7 Temporary Wireless Communications Facilities

Any facility designed for temporary use is subject to the following:

1. Use of a temporary facility is allowed only if the owner has received a temporary use permit from the Village Planner.
2. Temporary wireless facilities are permitted for use of no longer than 30 days for use while constructing permanent facilities and no longer than 5 days for use during a special event.
3. The maximum height of a temporary wireless facility is 50 feet from grade.

4.8 Interference with Public Safety Telecommunications

No new or existing telecommunications service shall interfere with public safety telecommunications. All applications for new service shall be accompanied by an intermodulation study which provides a technical evaluation of existing and proposed transmissions and indicates all potential interference problems. Before the introduction of a new service or changes in the existing service, telecommunications providers shall notify the municipality at least ten business days in advance of such and allow the village to monitor the interference levels during the testing process.

4.9 Abandoned or Unused Towers or Portions of Tower

Abandoned or unused towers or portions of towers shall be removed as follows:

1. The owner of a wireless facility shall file annually a declaration with the Village Manager as to the continuing operation of every facility installed subject to these regulations. Failure to do so shall be determined to mean that the facility is no longer in use and considered abandoned.
2. All abandoned or unused towers and associated facilities shall be removed within 180 days of the cessation of operations at the site unless the Village Manager approves a time extension not to exceed 180 days. A copy of the relevant portions of a signed lease which requires the applicant to remove the tower and associated facilities upon the cessation of operations at the site shall be submitted at the time of application. In the event that a tower is not removed within 180 days of the cessation of operations at a site, the tower and associated facilities may be removed by the municipality and the costs of removal assessed against the property.
3. Unused portions of towers above a manufactured connection shall be removed within 180 days of the time of antenna relocation. The replacement of portions of a tower previously removed requires the issuance of a new wireless facility permit.

4.10 Signs and Advertising

The use of any portion of a tower for signs other than warning or equipment information signs is prohibited.

In either case, the owner or his agent shall make application on a special form furnished by the Village before any connection is made to a public sewer. The permit application shall be supplemented by any plans, specifications, or other information considered pertinent in the judgment of the Superintendent. Permit and inspection fees shall be paid to the Village Treasurer at the time the application is filed, and shall be in such amounts as the Village Council shall, from time to time, determine by resolution.

Section 3. All costs and expense incidental to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the village from any loss or damage that may directly or indirectly result from the installation of a building sewer.

Section 4. A separate and independent building sewer shall be provided for each building: except where one building stands at the rear of another on an interior lot and no private sewer is available nor can one be constructed to the rear building through an adjoining alley, court, yard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

Section 5. Old building sewers may be used in connection with new buildings only if, on examination and test by the Superintendent, they are found to meet all requirements of this ordinance.

Section 6. The building sewer shall be cast iron pipe ASTM A-74, vitrified clay sewer pipe ASTM C-13, or cement asbestos pipe class 1500, or PVC Schedule 40 plastic pipe. In filled or unstable ground the pipe shall be extra heavy cast iron, except that the non-metallic material may be accepted if laid on a suitable concrete bed or cradle as approved by the Superintendent.

Section 7. The size and slope of the building sewer shall be subject to the approval of the Superintendent, but in no event shall the diameter of the pipe be less than four (4) inches. The slope of building sewer shall be not less than one-eighth (1/8) inch per foot if six (6) inch or larger diameter pipe is used, and one-quarter (1/4) inch slope per foot if four (4) inch diameter pipe is used.

Cast iron pipe joints shall be firmly packed with oakum or hemp and filled with molten lead, not less than one (1) inch deep. Lead shall be run in one pouring and caulked tight. In low areas having high ground water table, building sewer pipe of vitrified clay shall have premium joints. No paint, varnish or other coatings shall be permitted on the jointing material until after the joint has been tested and approved.

Section 9. All excavations required for the installation of a building sewer shall be open trench work, unless otherwise approved by the Superintendent. Trenches shall be adequately guarded with barricades and lights so as to protect the public from hazard. Backfill shall be performed in accordance with good practice to 95% density, except that no backfill shall be placed until the work has been inspected. Streets, sidewalks, parkways, and other public property, disturbed in the course of the work, shall be restored in a manner satisfactory to the Village.

Section 10. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. No building sewer shall be laid parallel to and within three (3) feet of any bearing wall, which might thereby be weakened. The depth shall be sufficient to afford protection from frost. The building sewer shall be laid at uniform grade and in straight alignment insofar as possible in accordance with good practice. Changes in direction shall be made only with properly curved pipe or long-radius fittings. Each bend of 45 degrees or over shall have a clean cut.

Section 11. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

Section 12. The connection of the building sewer into the public sewer shall be made at the Wy branch, if such branch is available at a suitable location, otherwise a smooth, round hole, machine-drilled into the main sewer pipe shall be made. The invert of the building sewer at the point of connection shall be at least two (2) inches higher than the invert of the public sewer, but the building sewer shall not extend past the inner surface of the public sewer. A smooth, neat water tight joint shall be made with an approved bituminous type material and secured by encasement in concrete. The connection shall be made under the supervision of the Village Superintendent.

Section 13. No person shall make connection of roof downspouts, footing drains, areaway drains or other sources of surface runoff or ground water to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.

Section 14. The applicant for the building sewer permit shall notify the Superintendent when the building sewer is ready for inspection and connection to the public sewer.

Section 15. Any deviation from the procedures and materials prescribed in this Article must be approved by the Superintendents before installation.

Article V.

USE OF THE PUBLIC SEWERS

Section 1. No person shall discharge or cause to be discharged any storm water, surface water, ground water (footing drains), roof runoff, subsurface drainage, cooling water, unpolluted air-conditioning water, or unpolluted industrial process waters to any sanitary sewer. A normal amount of ground water leakage into basements may be drained to the sanitary sewer; however, any excessive volume of basement drainage as determined by the Superintendent will not be permitted.

Section 2. Storm water and all other unpolluted drainage shall be discharged to sewers specifically designated as storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water, unpolluted air-conditioning water, or unpolluted process waters may be discharged to a storm sewer or natural outlet upon approval of the Superintendent.

- (b) Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the

sewage treatment facilities including but not limited to, cyanides in excess of 2 mg/l as CN in the wastes as discharged to the public sewer.

- (c) Any waters or wastes having a pH lower than 5.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.
- (d) Solids or viscous substances in quantities of or such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails, paper dishes, cups, containers, etc. either whole or ground by garbage grinders.

Section 4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property or constitute a nuisance. In forming his opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment facilities, degree of treatability of wastes and other pertinent factors. The substances prohibited are, but not limited to:

- (a) Any liquid or vapor having a temperature higher than one hundred fifty (150) degrees Fahrenheit (45 degrees Centigrade).
- (b) Any water or waste containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) degrees Fahrenheit and one hundred fifty (150) degrees Fahrenheit (0 degrees and 65 degrees C.).
- (c) Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourth (3/4) horsepower (0.76 HP metric) or greater shall be subject to the review and approval of the Superintendent.
- (d) Any waters or wastes containing strong acid, iron pickling wastes, or concentrated plating solutions whether neutralized or not.
- (e) Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.
- (f) Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which may be established by the Superintendent as necessary, after treatment of the composite sewage, to meet the requirements of the State, Federal or other public agencies of jurisdiction for such discharge to the receiving waters.

- (g) Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.
- (h) Any waters or wastes having a pH in excess of 5.5.
- (i) Materials which exert or cause:
 - (1) Unusual concentrations of inert suspended solids such as, but not limited to, Fullers earth, lime slurries and lime residues, or of dissolved solids such as, but not limited to, sodium chloride and sodium sulfate.
 - (2) Excessive discoloration such as, but not limited to, dye wastes, vegetable tanning solutions.
 - (3) Unusual B.O.D., chemical oxygen demand, or chlorine requirements in such quantities to constitute a significant load on the sewage treatment works.
 - (4) Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.
- (j) Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

WATER SERVICE CROSS CONTAMINATION ORDINANCE

An ordinance concerning water service, prohibiting the use of certain secondary water supplies from groundwater wells for the delivery of water for human consumption and the use of wells which may influence the movement of contaminated groundwater.

THE VILLAGE OF EDMORE HERBY ORDAINS:

Finding and Definitions.

The Village of Edmore hereby finds that the use of wells and secondary water supplies from wells for the delivery or use of water from or on certain premises for human consumption or the use of well which influence the movement of contaminated groundwater constitutes a potential public health risk. The identified public health risk affects premises that are located in the vicinity of sites that are the source of location of contamination of groundwater, or where there is a known and identified threat of contaminated groundwater from a release. The Village Council has determined to prohibit certain uses of water from wells and such secondary water supplies from properties located in the vicinity of such contaminated sites in order to protect and minimize the said public health risk. The following definitions apply:

- a. The term “secondary water supplies” shall mean only secondary water supplies from wells.
- b. The term “affected premises” shall mean a parcel of property any part of which is located within, or within one-quarter mile of, where a plume of contaminated groundwater exists.

The Village will maintain and publish notice of a listing of the known geographical location of affected premises, identifying same by property tax identification and parcel numbers. The listing and a copy of this ordinance will be maintained in the same manner as a zoning ordinance at the said Village department and the list shall be reviewed and amended as necessary at least annually, and whenever the Village learns of such affected premises. Review and amendment of the list shall also occur whenever the Village receives written notice from the MDEQ that it is considering approval of a Remedial Action Plan or equivalent action which relies on this ordinance as an institutional control to prevent groundwater use by adding the necessary affected premises to the listing. Interested parties may petition the Village to add new listings, or to delete listings if it can be shown that such affected premises no longer poses a public health risk.

- c. The term “human consumption” means use in food or drink intended for human ingestion, use in food preparation or food service, use in the interior of a dwelling or dwelling unit served by such well or secondary water supply for any household purpose, and use in any building for personal washing or ingestion by humans. The term “human consumption” does not mean use of water for irrigation.

- d. The term “MDEQ” means the Michigan Department of Environmental Quality or its successor agency.
- e. The term “contamination” means groundwater contamination in concentrations that exceed the residential drinking water criteria established by the MDEQ pursuant to Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451 as amended, by operational memorandum or rule.

Prohibition of the Use of Secondary Water Supplies for Human Consumption Exceptions.

Prohibition. Unless specifically excepted by this ordinance, after the effective date of this ordinance, the use of any secondary water supplies from or on an affected premises, or the use of water from said sources, for human consumption is prohibited. No new groundwater wells may be installed on affected premises unless use of such well is solely for commercial or industrial non-contact cooling or processing purposes, construction de-watering, MDEQ or United States Environmental Protection Agency approved groundwater monitoring or remediation systems, or public emergency.

Exception: Water Service Unavailable. If Village water service is unavailable to such premises, and a well is tested and approved by the MDEQ, Drinking Water and Radiological Protection Division or the county health department annually, and written proof thereof is delivered to the Village annually, a well may be used temporarily for water for human consumption until the Village water service is available to the premises. No split or conveyance of any premises shall be effective to render Village water service unavailable.

Exception: Waiver: Proof of No Influence. On an affected premise demonstrated to be free of the influence or potential influence of groundwater from a contaminated site, such as a property which is within one quarter mile of a plume but is determined permanently to be unaffected by the course of the groundwater affected by the contamination, the Village Manager may execute a waiver allowing the use of a well or secondary supply water for human consumption.

Exception: Public Emergencies and Construction De-watering. Use of well for public emergencies or construction de-watering purposes shall not be prohibited by this ordinance.

Sources of Water Supplied for Human Consumption. Except as provided above, water supply for human consumption on any affected premises in the Village shall be delivered only from the City water system or by the use of bottled water delivered or purchased in containers under conditions approved by the MDEQ, Drinking Water & Radiological Protection Division or other appropriate agency.

Wells or Secondary Water Supply Affecting Contaminated Groundwater. No well may be used or installed at any place in the Village if the use of such well will have the affect of causing the migration of groundwater contaminants or pollution or a groundwater plume containing same to previously unimpacted groundwater, or adversely impacting any groundwater treatment system unless the well is part of any MDEQ or United States Environmental Protection Agency approved groundwater monitoring or remediation system.

Inspection: Enforcement. The Village shall periodically canvass or inspect all affected premises in the Village of Edmore where it is suspected that a well or secondary water supply is being used as a source for water for human consumption and shall notify by appropriate means the owners and occupants thereof to connect to the Village water supply or supply water in conformity with this ordinance and to disconnect and disable, in accordance with legal requirements, any water supply for human consumption from a well or secondary water supply.

Modification or Repeal of this Ordinance: Notice to the State of Michigan. In the event this ordinance is considered for modification or repeal, where said modifications or repeal will allow the use of groundwater wells or secondary waste supplies for human consumption on affected properties, this ordinance shall not be modified or repealed except upon 30 days notice to the MDEQ.

Penalty, Permit Denial Remedies.

Where by reason of the exceptional narrowness, shallowness, or shape of a specific piece of property on the effective date of this Ordinance, or by reason of exceptional topographic conditions, or other extraordinary conditions of land, buildings, or structure, or of the development of property immediately adjacent to the property in questions, the literal enforcement of the requirements of this Ordinance would involve practical difficulties or would cause undue hardship.

No variance in the provisions or requirements of this Ordinance shall be authorized by the Board unless the Board makes findings, based upon competent material and substantial evidence on the whole record:

- a. That special conditions or circumstances exist which are peculiar to the land, structure or buildings involved and which are not applicable to other lands, structures or buildings in the same district.
- b. That literal interpretation of the provisions of this Ordinance would deprive the applicant of property rights commonly enjoyed by other properties in the same district under the terms of this Ordinance.
- c. That the special conditions or circumstances do not result from the actions of the applicant.
- d. That the authorizing of such variance will not be of substantial detriment to the neighboring property and will not be contrary to the spirit and purpose of this Ordinance.
- e. That with respect to use variances, the property cannot reasonable be used in a manner consistent with existing zoning.

No nonconforming use of neighboring lands, structures or buildings shall in itself, be considered grounds for the issuance of a variance.

SECTION 16.06 CONDITIONS OF APPROVAL.

In authorizing a variance or exception or in reversing a decision on an appeal, the Board may, in addition to the specific conditions of approval called for in this Ordinance, attach thereto such other conditions regarding the location, character, landscaping or treatment reasonably necessary to the furtherance of the intent and spirit of this Ordinance and the protection of the public interest.

SECTION 16.07 TIME LIMITATIONS ON VARIANCES.

- b. When an application or appeal has been filed in proper form and with the required data, the Secretary of the Board shall immediately place the said application or appeal upon the calendar for hearing and cause notices stating the time, place, and object of the hearing to be served. Such notices shall be served personally or by mail at least ten (10) days prior to the day of such hearing, upon the applicant or the appellant, the Zoning Administrator, and all persons to whom any real property within three hundred (300) feet of the premises in question shall be assessed and to the occupants of all single and two-family dwellings within three hundred (300) feet of the premises in question. Such notices shall be served personally or by regular mail, addressed to the respective owners and tenants at the address given in the last assessment roll. Any party may appear at such hearing in person or by agent or by attorney.

- c. Upon the day for hearing any application or appeal, the Board may adjourn the hearing in order to permit the obtaining of additional information, or to cause such further notice as it deems proper to be served upon such other property owners as it decides may be interest in said application or appeal. In the case of an adjourned hearing, persons previously notified and persons already heard need not be notified of the time of resumption of said hearing unless the Board so decides.

SECTION 16.09 DECISIONS OF THE BOARD.

The Board shall decide all applications and appeals within thirty (30) days after the final hearing thereon. A copy of the Board’s decision shall be transmitted to the applicant, or appellant, and to the Zoning Administrator. Such decision shall be binding upon the Zoning Administrator and observed by him/her and shall incorporate the terms and conditions of the same in the permit to the applicant or appellant whenever a permit is authorized by the Board. A decision of the Board shall not become final until the expiration of five (5) days from the date such decision is made unless the Board finds the immediate effect of such decision is necessary for the preservation of property or personal rights and shall so certify on the record.

SECTION 16.10 STAY OF PROCEEDINGS.

An appeal shall stay all proceedings in furtherance of the action appealed from unless the Zoning Administrator certifies to the Board after notice of appeal shall have been filed with him, that, by reason of fact stated in the certificate, a stay would, in his opinion, cause imminent peril to life or property. In such case, proceedings shall not be stayed otherwise than by a restraining order which may, on due cause shown, be granted by the Board or by the Circuit Court on application, after notice to the Zoning Administrator.

POLICY NO. 2

GRANTING TAX ABATEMENTS

The primary goal of Edmore's industrial development incentive program is to provide an atmosphere which will encourage capital formation and investment in our community. A secondary, but still important goal, is that of job creation and/or retention. To these ends, the Village Council will evaluate all Act 198 and 255 applications in view of the following goals and objectives.

- 1) The project will expand the Village's tax base.
- 2) The Village determines that a beneficial public purpose would be served (i.e. additional employment, income and capital investment with the community).
- 3) The development will compliment the Village's land use and Master Plan objectives.
- 4) The development will provide economic stimulus to other private sector facilities.
- 5) That the applicant meets all of the current financial obligations to the Village, is in compliance with all applicable State and Village codes and ordinances and has no pending or current litigation against the Village (including appeals to the Michigan Tax Tribunal).
- 6) That the applicant is not requesting abatements for office equipment. (No abatements will be provided for office equipment.)
- 7) That the estimated value of the construction is at least \$30,000.

In addition, no abatements will be granted for rehabilitation projects unless there is a change in use; a change in ownership; or the value of the project is in excess of 10% of the current value of the property and the project is not attributable to delayed or deferred maintenance.

If the above criteria are met by the applicant, the Village Council will consider the application and grant abatements based on the Tax Abatement Duration Chart. (The Chart is considered only to be a "guide" and the Village reserves the right to reject any and all applications if the Council feels it is in the best interests of the Village to do so. In addition, the Village reserves the right to increase an abatement above that provided for by the chart if compelling circumstances arise beyond the scope of a typical tax abatement applications.)

**OPERATING PROCEDURE NO. 11
SIDEWALK REPLACEMENT AND MAINTENANCE**

1. Property owners are required to maintain all sidewalks adjacent to and abutting upon their lots and premises and to keep them in repair at all times.
2. Property owners, who have sidewalks adjacent to or abutting upon their lots or premises that are deemed by the Department of Public Works Director to be a threat to public safety or inadequate, will be notified by Certified mail that they must repair and/or rebuild the sidewalks within sixty (60) days.

Sidewalks will be considered unsafe and/or inadequate if pieces of the sidewalk are broken off, buckled, and/or if large cracks have formed that could cause an individual walking on the sidewalk to trip and fall. Formal inspections of the sidewalks will be performed by the DPW Director in June of each year, starting in 1991.

Sidewalks deemed unsafe shall be marked with a large "X" of either red, orange, or yellow paint.

3. If sidewalks need to be constructed, rebuilt, or repaired, the property must construct and lay the sidewalk upon such lines and grades, and of such width, materials, and manner of construction, as deemed property by the DPW Director. The expense for such construction will be paid for by the property owner whose property is adjacent to or abutting upon the sidewalks. If two or more property owners abut upon the same section of the sidewalk, the expense shall be equally apportioned between both property owners.

Sidewalks which have been deemed unsafe, but are not considered by the DPW Director to constitute an important segment of the Village's sidewalk system, may be removed, in lieu of repair, at the expense of the property owner.

4. If the property owner does not construct, repair, or rebuild any particular sidewalk as mentioned or prescribed in the last section within the time frame allotted, the Village may cause the work to be done, at the expense of the property owner, together with a 10% penalty in addition thereto, to be reported to the assessor and levied as a lien upon the lot or premises.
5. The Council may, by a two-thirds (2/3) vote of all members, agree to pay up to 50% of the expense of rebuilding or repairing a sidewalk designated as unsafe by the DPW Director. (Sidewalks within the boundaries of the DDA will be replaced or constructed with TIF monies after September of 1991.)
6. If a property owner does not repair, or rebuild any particular sidewalk designated by the DPW Director as unsafe within the time frame allotted, the Village will not share in the expense of the required sidewalk work.

OPERATING PROCEDURE NO. 14
SNOW REMOVAL

Snow Removal is a highly visible portion of the Department of Public Works' activities. As such, it is both important and often misunderstood by community residents. The major purpose of snow removal is not to ensure that "blacktop" is showing on all the streets, but to ensure that traffic within the community can move safely. To meet this goal, the following procedures have been enacted:

- 1) Snow will generally be removed if more than 2 inches have accumulated. If less than two inches have accumulated, the DPW Director shall determine if the Village roads need to be plowed or, if the snow has accumulated during non-business hours (i.e. weekends and nights), the on-call employee shall make that determination.

- 2) The following priorities are established for removal of snow:
 - a) The first priority is M-46, Wyman Road, Gilson and Home between Lewis and Wyman, and Lewis, Third, Fourth, and Fifth between Home and Gilson;

 - b) The second priority is Industrial Drive, Second Street between Gilson and Webb Elementary, and the Curtis Community Center parking area;

 - c) The third priority includes all remaining residential streets;

 - d) The fourth priority is the removal of snow from the downtown municipal parking lots;

 - e) The last priority is the removal of snow from the Second Street sidewalk and the Main Street sidewalk between the downtown business section and the Middle School.

- 3) Generally, snow will be removed after it has accumulated more than two inches. If this accumulation occurs during normal business hours, two or more DPW employees will generally be assigned to snow removal. If the accumulation occurs during weekends or nights, the on-call employee shall remove the snow and have the authority to require another DPW employee to report to work, if assistance is necessary. (If conditions warrant, the on-call employee shall begin snow removal at 2:00 a.m., or when the snow accumulates to a depth of more than two inches.)

- 4) Salt will only be utilized if slick or slippery conditions exist or if weather forecasts indicate a need. Salt will normally be spread only if the temperature is above 20 degrees Fahrenheit. If the temperature is below 20 degrees, sand (i.e. a mixture of sand and chloride) will be used.

Salting will be done only after the first three priorities under section two are completed or if a DPW employee is available to "salt" during snow removal operations which occur during normal hours of operation. (i.e. 8:00 am. to 5:00 p.m.)

If slippery conditions develop at any intersection, DPW will spread salt or sand as soon as it is aware of the problem.

OPERATING PROCEDURE NO. 15
ICE RINK MAINTENANCE

In order to provide a winter recreational opportunity for area residents, Edmore shall prepare and maintain an ice rink on the Village Duck Pond using the following procedures:

- 1) The Department of Public Works shall post “No Skating” signs at the pond from the day the pond freezes until the surface of the pond is frozen to the depth of 5 inches or more of clear “blue” ice. If at any time during the winter skating “season” the ice becomes less than 5 inches thick or at any time the DPW determines that the surface of the pond represents a threat to public safety (e.g. the surface becomes snowy, soft, or candled), the DPW shall immediately post “No Skating” signs.
- 2) Once the DPW determines that the surface of the pond is of adequate thickness (i.e. at least 5 inches thick of clear ice), the DPW shall prepare a portion of the pond at least 75 feet wide – running from North to South – and 170 feet long – running from West to East – for skating.

The DPW shall mark the boundaries of the rink and post signs warning people to stay within the rink boundaries. Also, a pathway to the skating surface shall be prepared and maintained.

Preparation of the surface shall include:

- A. Checking the thickness and condition of the ice surface;
- B. Removing all snow and/or debris from the skating area;
- C. Flooding the surface, as necessary, to maintain a smooth skating surface.

- 3) During the early weeks of rink preparation, all work shall be completed by hand. Only after the surface of the rink reaches a thickness of 6 inches or more of good clear ice shall any motorized equipment be utilized for surface preparation.
- 4) The DPW shall, as necessary, maintain the surface of the rink by removing snow and/or debris and periodically flooding the surface to maintain a smooth skating surface. Flooding shall only be utilized if the temperature is below 20 degrees Fahrenheit.
- 5) Although preparing and maintaining the rink is considered to be an important part of DPW's winter duties, it is recognized to be of lower priority than snow removal, operation and maintenance of the sewer and water system, and the repair or maintenance of capital equipment.
However, DPW should schedule to prepare the surface of the pond on Friday afternoons to allow the use of the pond by residents over weekends and/or holidays. The pond will not be maintained on weekends or through the use of over-time by DPW.

OPERATING PROCEDURE NO. 17
MANAGING UTILITY CUTS ON VILLAGE STREETS

Public law and legal decisions hold that any unit of government with jurisdiction over a public road and street system is totally responsible for them. In addition, since utility cuts are included in this responsibility, there is an increased legal exposure if utility cuts are not properly repaired or inconsistent practices are followed.

To ensure that utility cuts are properly repaired, the following procedure will be followed:

- 1) All persons, firms, associations, partnerships, corporations, or other legal entities will complete the attached permit for street opening before any utility cut can be made in a street, road, or sidewalk within the corporate boundaries of the Village of Edmore.
- 2) If an emergency requires an immediate utility cut to be made and the Village offices are not open or can not be notified, notification shall be made to the County Dispatch who will then notify the Department of Public Works employee on standby assignment. The permit for street opening must then be completed the next business day during which the Village offices are open.
- 3) A performance bond or certified check in the amount of \$1,000.00 shall be required to be posted with the street opening permit for any utility cut within a street or road. A performance bond or certified check in the amount of \$200.00 is required for any utility cut on a sidewalk. (The Village Manager may increase the amount of the performance bond or certified check if it is determined the construction will be of a major nature.)
- 4) The trench cut should be as narrow as possible while ensuring workers safety, repair of the utility and backfilling and compaction. Cuts in the bituminous pavement must be made by saw or four-inch air spade to ensure straight-sided cuts. Utility cuts can not be made with a backhoe bucket which create jagged edges and weaken the surrounding pavement.
- 5) All street or road utility cuts shall be compacted and patched per the attached standards. All backfill material should be of a nature similar to the surrounding subsurface. If native soils are organic, silty, or of other poor types, they must be removed from site and replaced with either clean sand or clear pit-run material. (Special mixtures of sand/cement, sand/lime, or sand/bitumen can also be used for small trench openings.)

Whatever materials are used to backfill the trench, the contractor or utility personnel must use good backfilling methods. Compaction should meet all the requirements for normal road construction.

The new pavement material should be the same as the adjacent pavement material. It should be blended in and sealed to the edges of the saw-cut to minimize the potential for water infiltrating into the subgrade. (The attached diagrams show standards for trench compaction and utility patches.)

- 6) The DPW Director shall be required to inspect the progress of the work. The person, firm, association, partnership, corporation, or other legal entity named on the street opening permit shall notify the Village as to when the work will begin. The DPW Director shall have the authority to suspend the work if it does not adhere to specifications or standards.
- 7) The Village shall give final inspection of the utility cut within seven calendar days after being informed by the contractor that the backfilling, compaction and patch work is completed. After final approval has been granted by the Village, the certified check or performance bond will be returned after the six month warranty period is completed.
